ALUMINIUM BEAM

The Aluframe Aluminium Beam is designed to provide a strong, clean, and reliable structural solution for patios, pergolas, carports, and outdoor living projects. engineered to meet relevant Australian standards, giving builders and installers confidence in both strength and compliance.

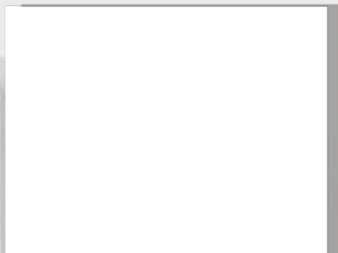

COLOUR RANGE

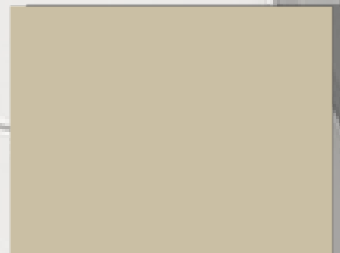

Our colour range has been selected to provide a clean, durable finish suitable for a wide variety of patio, carport, and pergola designs. With options ranging from classic neutrals to modern architectural tones, each finish is designed to complement surrounding roofing, framing, and outdoor living spaces while maintaining a premium, professional appearance.
